

Attention Reserve Chorus Members:

Free Music Theory Classes just for You!

The Singing Angels theory class is a wonderful way to supplement your child's music education. The classes will be taught by Jim Fair and Heather Liuzzo, and will cover the basics of how to read and write music.

Some of the subjects covered in class include identification of musical symbols (treble/bass clef, staff, repeat signs, etc.), notes on the staff, pitch matching, reading rhythms, time signatures and key signatures.

Even if your child can read music, already studies an instrument, or is just beginning, music theory will help him/her achieve his/her music potential.

Classes will begin Saturday, October 9, 2010, after rehearsal from 2:15 pm until 3:00 pm, and continue every Saturday. Angels should bring a snack and a beverage to consume between 2:00pm and 2:15 pm.

Any questions? Please contact Kay Eversole at (216) 432-5555 Ext.17 or (216) 732-8726.
